About

I am in love with everything related to IA and Machine Learning. I hope to have an opportunity to be part of an Inria Research Team during my 6 month internship

Work Experience

Founder, Swallify

Mar 2017 - Aug 2017   ⏱ 5 months

Swallify is a platform which gathers feeds from many social networks and displays them in a nice and beautiful way. Perfect for any events or presentation on a TV. There are multiple features like a random picker for contest but also a scoring system if you want to plan a sort of contest with your public

- Leading abilities, search for investor and gain marketing skills
- Algorithm in nodejs to fetch data from different social networks thanks to their API
- Plan all the server and solution to deliver the best experience worldwide without lag or bugs

Fullstack Intern, OhMyGeorge

Oct 2016 - Jan 2017   ⏱ 3 months

During this Internship, I learn a lot of new things about agile dev, life in a startup, marketing. I also gain skills in new languages (nodejs, meteor). I help to make the frontend of the mobile app but also the backend (API, authentification server).

- During my spare time I made a dashboard to help the marketing team and give a better visibility of the user action - https://github.com/ethanquix/omg_dashboard

Skills

Development (): C / C++, NodeJs, Python.

Team Work (): Git, Agile Dev (Jira / Trello / GitLab / Slack), Windows / Unix.

EDUCATION

Computer Science, Master, Epitech

Sep 2015 - Sep 2020

Deep Learning, Introduction, Udacity
